

We strongly oppose the potential changes under consideration that would allow a few major corporations to expand their ownership of media outlets in the same area. We understand a vote will be taken the first of June on this issue. It should be delayed and given much broader exposure and public notice. We are losing our objective views when just one conglomerate feeds us "their side". The action contemplated, if adopted, is not in the "public interest", which, if we are not mistaken, is the function of the FCC.
